

2026 INTERNATIONAL SUMMER PROGRAM

The **Sir Wilfrid Laurier School Board** is proud to collaborate with **Languages Across Continents (LAC)** to offer an exciting international **STEAM summer program in 2026**. Created for curious and motivated learners from around the globe, this immersive experience combines hands-on exploration in **Science, Technology, Engineering, Arts, and Mathematics (STEAM)**. Led by experienced English Second Language (ESL) educators, the program empowers students to develop their language skills while solving real-world problems through collaborative, project-based learning.

Beyond the classroom, students will discover Canada through cultural excursions to iconic destinations including Ottawa, Toronto, and Montréal. Whether building prototypes, creating digital art, or visiting the Planetarium, participants gain lasting memories, enhance language fluency, and strengthen their global skills. Backed by more than a decade of success, this STEAM program promises an enriching and unforgettable Canadian adventure. Benefit from this ALL-INCLUSIVE program offering dynamic and engaging academic activities, transportation, medical insurance, accommodations at the Cosmodome Space and Science Museum Residence, meals, cultural visits, custodianship and more!

English Second Language (ESL) / French Second Language (FSL)

Our English and French language programs are designed with flexibility and student success in mind. Through engaging, learner-centered instruction, we help each student build practical communication skills that empower them in both academic and everyday contexts.

STEAM

Our STEAM programs spark innovation and creativity by combining technical learning with immersive second-language instruction. Students bring their ideas to life through hands-on projects, critical thinking, and teamwork. Developed by expert educators, these original lessons help learners deepen both their subject knowledge and language proficiency, all while tackling meaningful, real-world challenges.

Throughout the summer program, students will be immersed in English or French, practicing daily to strengthen both their speaking, listening, reading and writing skills. Students will also have the chance to interact with the broader community as they take part in cultural activities across Montréal, Ottawa, and Toronto, deepening both their language learning and their understanding of Canadian life.
